

CLEAR PATH™ WIPES

Lint-free Microfibre Endoscope and AER Basin Wipes

CAPTURE

Uses split microfibre technology to capture spores and other viable pathogens at a microscopic level. Can help to capture and remove superbug pathogens like C.Diff, VRE, CRE and Norovirus

REMOVE

Remove gross contamination and provide a more potent disinfection of pathogens. Disposable Wipes can be used with any brand of surface disinfectant and ensure maximum disinfectant contact time

DISPOSE

Single-use for disposal immediately after use. By capturing and disposing of spores and other viable pathogens, Clear Path wipes prevent the cross contamination of surface areas

Split microfibre is 1/100th the thickness of a human hair

Convenient waterproof dispenser package

Order Code	Description	Unit
W5412-30	Clear Path disposable lint-free low-particulate absorbent microfibre wipes 30 wipes per waterproof dispenser package, 20 packages per box	600 wipes/box
